Light or dark woody decor, wall-mounted constructions and clean lines make the Ravenna series a real reflection of nature in bathroom furniture.

This collection has a laconic design, neutral colors and maximum practicality.

The vanity units of this series are completed with a ceramic washbasin, and the image is complemented by the absence of door handles – their function is performed by the grooves between the front parts.

The collection has a multipurpose storage unit – when turned 180° it may become right or left.
